- 2. (Original) The electronically tunable dielectric material of Claim 1, wherein the additional metal oxide phases comprise a total of from about 3 to about 65 weight percent of the material.
- 3. (Original) The electronically tunable dielectric material of Claim 1, wherein the additional metal oxide phases comprise a total of from about 5 to about 60 weight percent of the material.
- 4. (Original) The electronically tunable dielectric material of Claim 1, wherein the additional metal oxide phases comprise a total of from about 10 to about 50 weight percent of the material.
- 5. (Original) The electronically tunable dielectric material of Claim 1, wherein the dielectric material consists essentially of two of the additional metal oxide phases.
- 6. (Original) The electronically tunable dielectric material of Claim 5, wherein the two additional metal oxide phases have a weight ratio of from about 1:100 to about 100:1.
- 7. (Original) The electronically tunable dielectric material of Claim 5, wherein the two additional metal oxide phases have a weight ratio of from about 1:10 to about 10:1.
- 8. (Original) The electronically tunable dielectric material of Claim 5, wherein the two additional metal oxide phases have a weight ratio of from about 1:5 to about 5:1.

	9.	Cancel claim 9.
	10.	Cancel claim 10
	11.	(Currently amended) The electronically tunable dielectric material of Claim 1[0],
wherei	n the b	arium strontium titanate is of the formula BaxSr1-xTiO3, where x is from about 0.15 to
about (	0.6.	
	12.	Cancel claim 12.
	13.	Cancel claim 13.
	14.	Cancel claim 14.
	15.	(Currently Amended) The electronically tunable dielectric material of Claim 1[4],
further	compr	rising at least one Mg-free compound.
	16.	(Original) The electronically tunable dielectric material of Claim 15, wherein the
Mg-fre	e comp	bound comprises an oxide of a metal selected from Si, Ca, Zr, Ti and Al.
	17.	(Original) The electronically tunable dielectric material of Claim 15, wherein the
Mg-fre	e comp	bound comprises a rare earth oxide.

AMENDMENT -- Page 5 of 8

	19.	Cancel Claim 19.
	20.	Cancel Claim 20.
	21.	Cancel Claim 21.
materia	22. l has a	(Original) The electronically tunable dielectric material of Claim 1, wherein the tunability of at least 25 percent at 8V/micron.

The electronically tunable dielectric material of Claim 1, wherein the

18.

23.

(Original)

material has a tunability of at least 30 percent at 8V/micron.

Cancel claim 18.
